**Instructions:**

Use the Sight Word Tracking List to help your student master each of the sight words! Use pencil or erasable pen. Beginning with the first word, determine if your student can already read and spell the word. If so, check the boxes in the first 2 columns, plus the MASTERY column, and move on to the next word. When working on a word your student hasn't mastered yet, as soon as he or she can spell it correctly, write the date in the Date 1 column. At the next study session, if your student can spell the word correctly again, write down that day's date. If not, erase the date under Date 1 and start again with that word. Do the same thing at the third study session. A sight word is MASTERED when your student has spelled it correctly for three consecutive study sessions! When that happens, put a check (or star!) in the MASTERY column! Have fun!
