

Directions for all Lucky Dog Games

All games are played the same way and work best with 2 or 3 players. The object is to get rid of your cards. Deal 3 cards to each player. Put the remaining stack face down with a card turned face up next to the stack. Player 1 checks his cards to see if he has a card with the letter/s highlighted **or** the symbol shown on the face up card. If so, he puts that card face up on top of the existing card. If he has the Lucky Dog he can put that card down and then **any** other card he has on top of it. If he has none of the above, he draws one card from the stack, hoping to get either a card he can use or the Lucky Dog. If he gets neither Player 2 is next. Continue until one player is out of cards. I usually play 3 rounds and the winner is the person that wins the most rounds.
